EDUCATION

Academic City University - Accra, Ghana

Graduating June 2027

Major: Computer Science

Relevant Coursework: Introduction to Python, Data Analysis, Programming in C, Object-Oriented Programming with C++, Database Systems, Web-Tech, Data Structures and Algorithms, Java.

EXPERIENCE

Union Systems Global - Remote

June, 2025 - August 2025

Software Engineering Intern

- Engineered and unit-tested new features for the company's flagship X.100 Core Banking System using Java and the Spring Boot framework, contributing to a module that improved retail banking transaction processing.
- Enhanced application security by assisting in the development of vulnerability patches and implementing code fixes, ensuring compliance with ISO 9001:2008 standards for financial software.
- Developed and documented RESTful APIs to facilitate integration between the core banking software and third-party payment systems (e.g., mobile money platforms), supporting the company's expansion into digital financial services.

Relu Interactives - Remote

Sept, 2024 - Dec 2024

Game Developer Intern

- Engineered a Target-Hitting game in UE5 with C++, integrating collision detection, a timed loop, and a scoring system.
- Created a Flappy Bird clone in Unity using C# to handle game physics, collisions, and player engagement mechanics.
- Collaborated remotely to debug issues and optimize performance, directly improving gameplay and UX.

PROJECTS

CineStream

[Project Link](#)

- Developed a TypeScript/Electron application for automated media library management, utilizing asynchronous operations for efficient concurrent processing and achieving high accuracy in media classification.
- Implemented a robust parsing engine with regex, fuzzy matching, and context-aware heuristics to accurately identify and organize files across varied international naming conventions.
- Enhanced performance with real-time file system monitoring and ensured data integrity through atomic operations.

Knowledge Hub

[Project Link](#)

- Engineered a full-stack React and Node.js platform for 300+ students to share resources across 50+ courses, driving collaboration via a secure, mobile-first application with user authentication and real-time notifications.
- Deployed a Docker-containerized application on Azure, ensuring a scalable and high-performance environment while managing the end-to-end development of features from data export to database design.

SKILLS

- **Programming languages:** Python, C++, C, C#, JavaScript, HTML, CSS, SQL, MATLAB, Java.
- **Worked with:** React, Node.js, Unity, Unreal Engine 5, Oracle, Git and GitHub, Express.js, NodeMailer, Vercel and Render, XLSX, Tailwind CSS, Framer Motion, MongoDB, PyQt5.
- **Soft Skills:** Initiative-Driven, Client Engagement, Problem Solving, Communication, Writing.

CAMPUS INVOLVEMENT

Rotaract Club, *Treasurer*, Academic City University

September 2025 - Present

- Managed the club's GHS 10,000+ annual budget, ensuring transparent fiscal oversight for all projects and events.
